Yofan Alfiatur

I am an information system graduate with an interest in information and technology (IT), especially websites and applications. I have developed websites using HTML, CSS/SCSS, and Javascript or CMS such as Wordpress with several page builders such as Elementor, wpbakery and oxygen. I'm interested in continuing to study various frameworks and libraries to develop my skills as a frontend developer. I also have an interest in data, such as data analysis and data engineering
